decision after two three-hour sessions, yesterday and today. The control council is the last resort for the 11 doomed to die.

The council also rejected petitions of Hermann Goering, Wilhelm Keitel and Alfred Jodl to be shot instead of hanged.

The council ruled further that the pleas of the S. S., the Gestapo, the S. D. (Secret Service) and the leadership group of the Naziparty were "not receivable because the control council is not authorized to reconsider the judgment of the international military tribunal; it can only grant elemency."

The council also turned down as "not receivable" the petition of Grand Adm. Erich Raeder that he be shot instead of imprisoned. The council pointed out that it was not "empowered to increase sentences." sions, yesterday and today. The

The recent Mexican "question" as to whether dangerous atomic processes could be placed under central international supervision, with only "denatured" fuels going to individual nations for peaceful purposes, must also be considered merely an effort to see if there is a field for bargaining. The commission's scientific report a few days before on how production of atomic power works contained the answer to that. In working with fissionable material there is never any point at which it can be said that "this is where we split. this hand is material which can be made into a bomb, on the other is material which cannot." A fix-ed corollary of working with fissionable material for peaceful purposes is the by-production of plutonium. With denatured material it apaprently is very difficult to produce enough explosive for bombs—but that is a matter of

JESTER OUTLINED

LUBBOCK, Tex., Oct. 8—(P)—
Beauford Jester, democratic nominee for governor, today outlined a state-wide program of wild game propaganda which he said he will recommend to the State Game. Fish and Oyster Commission.

Jester, here for the opening of the 29th annual Panhandie South Plains Fair, told newspapermen he hoped the commission in the next several years would stress game propaganda as much as policing.

"I realize that policing is necessary but along with policing a stepped up program of propaganda will in my judgment result in more and better game for Texas sportsmen," the prospective governor said.

Jester suggested a one dollar

Jester suggested a one dollar per season quall stamp system in the state similar to the Federal

duck stamp.

Jester said he had studied for several years the possibilities of restocking prairie chickens and pheasants in suitable areas.

CITY DADS BEEN UNABLE TO REPLACE COUPLE DEPARTMENT HEADS WHO WANT TO QUIT JOBS

Wanted—Bright young man as city secretary.

The city might even waive the "young" part of it; but it is believed they will stand adament on the "bright" angle. 'In the vernacular of the current generation, no "dope" can handle either of the jobs.

As a matter of feet the

no "dope" can handle either of the jobs.

As a matter of fact, the vacancy as chief engineer of the city has just about made the transition from potential to acutality.

Blucher Wans Leave.

Fred V. Blucher, who has the title now, has been trying to shake loose from it for a year. Now with the end of the year hurtling this way with its usual rapidity, he has hecome more determined. In fact, he is almost insistent that he be allowed to quit and quit quick.

Already his post has caused some mumbling, and bewildered shaking of official city heads. Recently Mayr Joohn C. Calhoun told members of the commissions "We've got to do something about Blucher."

The commissioners nodded af-nirmatively, but nobody appar-ently knew what to do about So far nothing, as far as has been learned, has been done about Blucher.

about Blucher.

Jones in Service.

There is an "angle" in this particular case. J. Mack Jones was the city engineer before he went off to the wars. The job was waiting for him when he returned. But the Marine Corps, probably not realizing that Corsicana surely could use a good engineer, won't let him return. Not yet, anyway.

Jones was hurt, and has been neoved from Corpus Christi to a hospital in California. Neither he, the Marine Corps nor the city officials know when he will be able to return

'c return.

In the meantime the \$220 a month job is beginning to pall on Elucher. And the city charter is fairly simple in its requirements. fairly simple in its requirements. The city engineer must be an accredited engineer, and not all engineers are. There, too, is a nurdle for the city officials to jump over if and when they feel like jumping over anything. They could probably put an engineer in the office who could handle the work, but the charter won't let them. Accredited he must be.

Welch Ready Leave.

If one enters the city hall on Main and turns to the left and then glances to the first door on the right he will see a sign, "City Secretary."

Here, too is a man with a job

Here, too, is a man with a job who wants to quit and can't.

He is veteran J. P. Welch, who has seen them come and go on

Welch is gently biding his time for a successor to come along So far the city commission hasn't been able to do much about that, either. In fact, they probably feel that finding somebody to take his place would be just like deciding to nire a new cornerstone for the muiding.

Welch is firm in his stand that he is going to quit. But he, too, is tangled in the web of replacement twine. The city secretary's jot involves more than occurs when one street sweeper hands his day shift broom to the night shift man

shift man.
No Clamor for Job. No Clamor for Job.

The city knows that the new sccretary, if and when he or she comes along, will have to study under Welch for at least three months and maybe longer, Learning city routine, involving as it does ordinances and resclutions, finances and whatnot, takes time. There has been no wild clamor for this job. There have been a few nibbles, but the bait wasn't good. They saw the voluminous work ahead, and mulled, but not too optimistically. One woman came down to see about the job. So far there have been no new names added to the payroll.

In the meantime, Blucher and Welch are like two men caught in bear traps. They want to go home, but something won't let them.

GADGET FOR POLIO

Some army man whose only as Burns invented a particular kind of valve while he was stationed at Wright Field Dayton, Ohio, during the war, It was just one of countless gadgets developed by the Army Air Forces because it seemed useful at the time.

That gadget, worth about 50 cents, is now believed to have been a major factor in saving the lives of 46 polio victims. It is used on an oxy-11 gen tank, to permit the oxygen to pass through a mask into a person's lungs. When normal lung capacity been reached, the valve shuts itself off, then opens in time for the next breath.

With this apparatus, a constant flow of exygen can be maintained without the; unusual tent which encloses the entire body up to the neck. Thus the Sister Kenny treatment of massage and hot packs can begin before the patient is able to -

To Subscribers and Friends of the Corsicana Semi-Weekly Morning Light

Because of the increased cost of print paper, general advances in pay rolls and higher prices of all materials and services that go into the making of a newspaper, and to be able to continue to give the public a high class newspaper as heretofore, it is necessary for the Corsicana Semi-Weekly Morning Light to increase its subscription prices beginning November 1st, as follows:

12 Months - - 53.00 In Advance No Subscription Less Than 6 Months

This slight raise in subscription price is much less than other papers over the nation are charging to meet the present conditions, and we feel sure our subscribers will be glad to co-operate so we may continue to give them a good newspaper.

The Corsicana Semi-Weekly Morning Light cannot stand still; it must continually strive to raise its standards of service to its subscribers and the public in general.

Economic needs cannot be ignored if this policy is to endure. Appreciating the patronage of the many thousands of subscribers to the Corsicana Semi-Weekly Light, we are-
